

Food Distribution Program A LINQ Solution for States

Changing your Food Distribution Program (FDP) for the better, LINQ is bringing together the best of COLYAR and TITAN to create a seamless Food Distribution Program for state agencies, recipient agencies and industry.

LINQ understands the complexity and time-consuming management of your FDP offering. With our new FDP solution, states will find flexibility with survey and catalog creation and maintenance, and efficiencies with recipient agencies' Planned Assistance Level (PAL) usage. This innovative product will increase program integrity while ensuring full usage of your PAL.

MAXIMIZED BENEFITS

Strengthen your program by ensuring every stakeholder is informed and has full transparency.

SUPPORTIVE EXPERTS

With LINQ, you're supported by folks with decades of experience working with States, Recipient Agencies and program management.

STUDENT-TO-STATE

LINQ is transforming K-12 by seamlessly connecting state agencies with school districts.

We Have You Covered

LINQ listened to our state customers to understand the challenges in dealing with their FDP. States shared specific feedback and we listened. We value our relationship with states, districts and industry partners and look forward to new enhancements and adding value to maximize the efficiency of all child nutrition programs.

Our new product for states will include:

ACCURATE FORECASTING

Use historical data to forecast for future ordering.

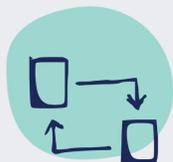

ENTITLEMENT INSIGHTS

Monitor recipient agencies' PAL usage and easily reallocate as appropriate.

FLEXIBLE SURVEY DESIGN

Create and design annual surveys with ease.

CATALOG MANAGEMENT

Flexible updates and edits for year-to-year catalog

INTEGRATED INVENTORY

Online inventory management to ensure proper levels at warehouses and processors.

FEATURE ENHANCEMENTS

Continually improve your FDP administration with regular feature enhancements.
