

LINQ

FORMS & WORKFLOWS

With LINQ Forms and Workflows, you can save time and streamline district processes without the need to manually track down information. Now, staff and administrators within your district can create custom workflows and ensure forms are fully completed from any web accessible device.

Feature Overview

- **Personalized Inbox**
View tasks waiting on you and your team
- **Digital Archive**
View completed submissions and download documents when needed
- **Electronic Signatures**
Collect legally binding and secure signatures
- **Teams**
Create teams for various departments and projects
- **Workflow Builder**
Build custom workflows for any process or data collection need
- **Dashboard**
View recent activity for any workflow
- **Forms**
Create custom forms or instantly digitize an existing paper form
- **Access Management**
Choose levels for users, forms, and workflows depending on role
- **Conditional Branching**
Route workflows to different locations based on input

A Solution for Every Department

No matter the form or approval process, LINQ Forms and Workflows can help you streamline your district processes and eliminate paperwork.

ADA Compliant

All 'digital forms' created on LINQ Forms and Workflows are coded to help ensure ADA compliance.

Secure

All forms and data are encrypted to protect from hacking.

Full Visibility & Control

By knowing the status of every form at various stages of the process, you are empowered to better manage district resources. Our powerful, yet easy-to-use, workflow automation solutions help you save time and simplify employee onboarding.

Auto Backup

All forms are safely stored on LINQ Forms and Workflows so you never lose a document.

Save Time & Energy

Automate your processes to ensure every form is routed to the correct department in seconds and eliminate the need for multiple stakeholders.

Guaranteed Accuracy

Do away with missing fields or incomplete data. Set required form fields and ensure your forms are accurately and completely filled out.
